- ★ The construction of the King/Broad Street crosswalk between Berlin's and the Lining House has been officially scheduled the week of July 13th-17th. *King Street between Berlin's parking lot and Queen Street will temporarily **become two-way**.* Crews will be working additional hours with extra hands on deck to complete this project in one week.
- ★ The crosswalk on the southeast corner of the King/Queen intersection was completed and the area re-opened on Thursday, July 2nd.
- ★ Resumption of the electrical ductbank work in the southside lane of Queen Street between the County's Queen Street Garage and the back of the Mills House Hotel is tentatively scheduled for a July 20th start date.
- ★ Because of the various hardscaping and utility projects underway in the block on King Street between Horlbeck Alley and Queen Street, there is one lane of thru traffic in the westside lane with no parking in this area.
- ★ The Charleston Library Society driveway will be demoed the week of July 6th-10th. Staff and patrons are asked to park in the City's 93 Queen Street Garage (on the west side of King Street) free of charge. The prime contractor will be scheduling the step renovation work for Gateway Walk on the south side of this property in the near future.
- ★ The complex electrical ductbank work in the SCE&G entrance continues next week.
- ★ This week in the Horlbeck Alley/Queen Street block between 179-184 King Street all water laterals were installed and the electrical conduit work is almost complete. Work on the SCE&G exit driveway begins next week and the Charleston Florist driveway has had base poured, granite curb and pavers installed this week with the curing process to take place next week. Base pouring, curb setting and bluestone installation will begin next week in front of Vieuxtemps, John Pope Antiques, Leggiardro and the software company.
- ★ On the southwest corner of the King/Market intersection (Saks), the electrical work is finished and the crosswalk construction is underway. This necessitates one lane of traffic heading east on Market Street through the King Street intersection. Please drive slowly in this area watching out for pedestrians and the safety of the construction crew.
- ★ Upcoming work along the entire length of Lower King includes the interior rehab of all electrical, sewer and telephone manholes and changing out all covers. Most manholes are out in the street in a very random pattern. Jersey barriers will be placed to mark the areas and for worker safety. This will require drivers to be constantly vigilant as vehicles proceed south on King Street.

FREE WEEKEND PARKING IN THE 93 QUEEN STREET GARAGE

Ours is the only country deliberately founded on a good idea. John Gunther

HAPPY JULY 4TH !
